

WHAT IS CLAIMED AS NEW AND DESIRED TO BE SECURED BY
LETTERS PATENT OF THE UNITED STATES IS:

Sub A1
1. Thermoinsulating mat of mineral fibers having a quasi-random orientation, comprising fibers, a great majority of which have a diameter between 1.5 and 4.5 micrometers and a length of 2 to 15 centimeters, wherein the mat has a density not greater than 40 kg/m³.

2. Mat according to claim 1, wherein the mat has a resistance to compression, for a crushing of 10%, at least equal to 0.5 kN/m².

3. Mat according to claims 1 or 2, wherein the mat has a heat conductivity coefficient not greater than 0.040 W/mK.

4. Mat according to one of claims 1 or 2, formed by a double crimping of a layer of mineral fibers.
